

How do I build a search in IQX that has TWO (or more) variables?

For example: They can be Primary Subject 'ART' **OR** Primary Subject 'DT' **AND** they can live in **EITHER** London or Surrey

You simply put all the criteria on the **RIGHT** hand side of the screen, with the second lot of criteria choices being dragged into the **ANY OF** box of the first lot of criteria.

The screenshot shows the IQX search interface. At the top, there is a green header bar with buttons: Criteria, Hints, Clear, Department (Education), Perm, Temp, Either, and Search. Below the header, the interface is divided into two main sections. The left section is labeled 'All of:' and is currently empty. The right section is labeled 'Any of:' and contains two criteria boxes. The first box has 'Primary Subject' set to 'Art' and 'Address' set to 'Contains London'. The second box has 'Primary Subject' set to 'DT' and 'Address' set to 'Contains Surrey'. A vertical scrollbar is visible on the right side of the 'Any of:' section.
