

Temps Tab

refers to:

temp desk form → temps tab

This is where you manage your group of Temps that have this desk assigned to them.

You can see at a glance where each temp is working on any particular day or whether they are unavailable.

The colour of the individual cell shows if the shift is Provisional (blue), Confirmed (burgundy) or Worked/Timesheeted (black)

Shift matching prioritises candidates who have Availability entered, and excludes those who are working, or have Holiday or Unavailable entered.

To quickly identify a particular temp within the temp desk pool, rather than scrolling through the list, click on the Search button to open the search window. The search works on whichever column is first, it defaults to Surname but if you need to search on any other column simply click on the column header and drag it to the left. If you have custom columns enabled on the Temps view these can also be searched on. Note the Search finds the first person that matches the result and is ideal for identifying individual temps.

The screenshot displays the 'Temp Desk' application interface. At the top, there's a header bar with 'Temp Desk' and a navigation menu. Below this, a control bar includes 'Desk' (Nottingham - Healthcare), 'View' (Weekly Shift), 'Year' (2017), 'Week' (35), and 'Ends 10/12/2017 (Current)'. There are buttons for 'Process', 'Update', 'Close', and 'Help'. A 'Vacancies' section has a 'Search' button highlighted with a red box. Below this is a table with columns for Temp, Skill, Known As, and days of the week (Monday to Sunday). The table lists several temps, including Bevin, Clark, Haynes, Leila, Hinton, Annalise, Hunt, Amber, Hunter, Alfie, Hunter, Jess, Hunter, Shelley, Jones, Jo, Mccarty, Kayden, Molina, Marcel, Odonnell, Scott (Esme ...), Perkins, Mikolaj, Richard, Inaaya, Singh, Billy, Smith, Thomas, Smyth, George, Smyth, Imogen, and Vega, Leyla (Esme Elec...). A 'Search for Temp' window is open, showing a search bar and a list of results. The search bar contains 'Bevin'. The results list includes columns for Surname, Forenames, Payroll No., and Skill. The first result is 'Bevin, Clark' with Payroll No. 30064 and Skill HCA. Other results include Haynes, Leila, Hinton, Annalise, Hunt, Amber, Hunter, Alfie, Hunter, Jess, Hunter, Shelley, Jones, Jo, Mccarty, Kayden, Molina, Marcel, Odonnell, Scott, and Esme

Other features include:

- Add types of availability

- View holiday pay
- Drag temps to add to vacancy shortlists or fill shifts
- Enter timesheets
- Process temps to send a mailmerge
- Run reports
