

Using Collections/Internal Chat

Example of Collection/Internal Chat above

- You can only add users to the chat if they have the collections user layout setting activated
- You can drag and drop records to Collections/Internal Chats including candidate, contact, timesheets and invoices
- When a user gets a pop up reminder to advise they have been added to a Collection/Internal Chat or that there is a new chat message, there is a button within the pop up that takes you to the Collections/Internal Chat view on Desktop, see below:
